INTRODUCTION

The Amadeus central system is a global distribution system (GDS) that allows users to provide complete travel arrangements for multiple travel-related companies, including airlines, trains, hotels, car rentals, cruises and ferries

AUDIENCE

This course guide is intended for Travel professionals attending the Amadeus Basic Reservation and Ticketing training course.

COURSE OBJECTIVES

The objective of the Amadeus Basic Reservation and Ticketing course is to provide a high standard of knowledge and experience in order for the participants to receive the Amadeus Certification.

COURSE GUIDE OBJECTIVES

The aim of this document is to reinforce the lessons you learn in the Amadeus Basic Reservation and Ticketing course. This guide provides help in understanding the material presented in the course

AMADEUS SIGN

The sign in functionality grants you access to the distribution system, thus enabling you to create reservations for your clients.

An agent sign is assigned to each person authorized to use an Amadeus terminal which is always password protected. This may be a unique agent sign, which provides a means of identifying actions taken by an individual in the same office.

Each Amadeus sign is a six-character code. The first four characters must be numbers. The last two characters can be letters or a combination of a letter and a number. Each sign can have a number of duty codes associated to it. These duty codes specify which transactions the agent can or cannot perform.

As far as travel agent is concerned it can work with two duty code AS and SU:

AS - AGENT SIGN (NORMAL) SU- SUPERVISORY

How to Sign In to the System:

JI1234AA /AS- PASSWORD

JI	Sign In transaction Code
1234AA	Agent Sign
/AS	Slash followed by the duty code
-PASSWORD	Dash, your password

What Are Work Areas?

There are six work areas in the system. Each work area is identified by a letter from **A** to **F**. If you do not specify a work area when you sign in, the system assigns the first available work area to you.

Only one PNR at a time can be active in a work area. You can work on more than one PNR at a time, each in a different work area.

Similarly, more than one agent can work on the same terminal at the same time. Each agent can sign in to a different work area using the individual agent signs.

The areas are identified as **A, B, C, D, E, and F**

How to Identify Your Work Area Status

To check the status of your work areas after you have signed in, enter: **JD**

```

8CB57524 1 KWIKT2298 2 PSEUDO CITY : AGY

AREA  TM  MOD SG DT.LG TIME QCAT ACT.Q  STATUS  NAME
A-IN          PRD SD/SU.EN  24    SIGNED
B                                NOT SIGNED
C                                NOT SIGNED
D                                NOT SIGNED
E                                NOT SIGNED
F                                NOT SIGNED
>

```

1

Terminal ID

2

Office ID

Here is a list of the different entries you can make:

To sign into first available area	Jl1234AA/AS
To Sign in to all six areas together	Jl*1234AA/AS
To Sign In to one area	JlA1234AA/AS
To Sign in to more than one work area	JlB/C1234AA/AS
To move to another active work area (area B)	JMB
To redisplay sign-in message	JB

Sign Out

Sign Out of an active area	JO
Sign Out of multiple work areas	JOC/D
Sign out of all work areas	JO*

Exercise:

1. What is the entry to find the terminal ID
2. What is the entry to find office ID
3. What is the entry to sign-in into Amadeus in all work areas
4. What is the entry to sign out of all work areas

ENCODING AND DECODING

Amadeus uses codes to represent locations, companies and equipment in the entries that you use in Amadeus and in the displays that are returned to you. Therefore, you need to be able to interpret the codes you see and use.

The airline industry uses a system that identifies each airport and city with a unique three-letter code. Each airline is identified by a unique two-character code. With these codes, which are administered by the International Air Transport Association (IATA) and the International Standards Organization (ISO), you can identify cities, airports and airlines.

For more information, see **HE ENCODE** or **HE DECODE**.

	FUNCTION	
	ENTRY FOR ENCODE	ENTRY FOR DECODE
City	DAN BRISBANE	DAC DXB
Airport	DAN JOHN F KENNEDY	DAC CDG
Country	DC FRANCE	DC AU
To know the currency of country	DC SWITZERLAND	DC SA
State / province (US, AU,CA,BR,AR only)	DNS US	DNS FLORIDA
Airline	DNA AIR FRANCE	DNA LH
Equipment / Aircraft Type	DNE AIRBUS	DNE 747
Hotel	DNH MARRIOTT	DNH EM
Car	DNC AVIS	DNC ZI
Date Time	DDLON	
Check Time Difference	DDKWI 1130/DXB	

Training exercise:

a. Kindly ENCODE below cities:

1. Auckland
2. Basra
3. Mumbai
4. Amsterdam

b. Kindly ENCODE below airport names

1. Narita
2. O Hare
3. John F Kennedy
4. Luton

c. Kindly ENCODE below airline names: (TWO LETTER CODE)

1. Kenya Airways
2. Emirates
3. Gulf Air
4. Air France

d. Kindly DECODE below airline:

1. SQ
2. LH
3. AI
4. AA

e. Kindly DECODE below airport codes:

1. CDG
2. EWR
3. LHR
4. SFO

f. Kindly DECODE below city codes:

1. DXB
2. VIE
3. FRA
4. MNL

AMADEUS AIR

Here we describe the functionality of Amadeus Air, its displays and the options you have to customize your requests.

There are three types of displays in the Air module:

- **Availability Display**

An Amadeus availability display shows all flights with at least one seat available for sale or waitlist, based on the transaction code and parameters you use to request the display.

- **Schedule Display**

An Amadeus schedule display shows all flights and classes operated by all airlines that submit schedule information to Amadeus.

- **Timetable Display**

An Amadeus timetable is a display of flights operating during a specified one week period.

WORKING WITH A TIMETABLE DISPLAY

HELP PAGE: HE TN

What Is a Timetable Display?

A timetable display shows all flights operating over a seven-day period for a given city pair. If you do not specify a date, the system uses the current date. Flights are ordered in the same hierarchy as for availability displays.

The display contains flights of all airlines for which schedule information is submitted to Amadeus. You can also display the flights of airlines that do not have a sales agreement with Amadeus.

Timetable displays do not show classes of service; therefore, you cannot sell seats directly from this display. Entry to Request a Timetable

TIME TABLE for specific carrier	TN 20MAY KWILON / ABA
---------------------------------	-----------------------

WORKING WITH A SCHEDULE DISPLAY

HELP PAGE: HE SN

An Amadeus schedule display shows all flights operated by all airlines that submit schedule information to Amadeus. For airlines that have a sales agreement with Amadeus, availability status codes by class of service are included in schedule displays regardless of whether seats are available.

The schedule display also shows the schedules of airlines that do not have a sales agreement with Amadeus (non-participating carriers). However, you cannot sell these flights.

SN15DECKWIDXB/AEK

BASIC SCHEDULE ENTRY

SCHEDULE FOR SPECIFIC AIRLINE

WORKING WITH AN AVAILABILITY DISPLAY

HELP PAGE: HE AN

An Amadeus availability display shows all flights with at least one seat available for sale or waitlist, for all airlines which have a sales agreement with Amadeus. Based on the transaction code and parameters you use to request the display.

An Amadeus schedule display shows all flights operated by all airlines who submit schedule information to Amadeus, based on the transaction code and parameters you use to request the display. For airlines that have a sales agreement with Amadeus, availability status codes are shown for each class of service, regardless of whether seats are available. The schedule display also shows departed flights.

Availability and schedule displays include flights up to 361 days in the future (less for some airlines) and up to 3 days in the past are stored in the system. Flights in the past are shown in an availability display without availability status codes.

The order in which flights appear on an availability or schedule display depends on the type of availability you request and (for all types) the regulations that apply in your own market

Basic Availability Entry:	
AN 10OCT KWILON	
AN	Availability neutral display
10OCT	Departure date
KWILON	City pair

OTHER SERVICE INFORMATION (OSI)

An OSI (other service information) element contains special information regarding a passenger for passengers in the pnr that is sent to the Airline that appear in the itinerary. An OSI element is not a service request and does not require confirmation for the Airline. Unlike SSR element SSR element do not result in the automatic placement of pnr's on queue if a response is received from the Airline

OS EK PAX IS VIP	Information for specific carrier
------------------	----------------------------------

OS YY PAX IS VIP	Information for All carriers
------------------	------------------------------

SPECIAL SERVICE REQUESTS (SSR)

FOR HELP HE SR

An SSR – Special Service Request is an application to an Airline to provide a particular facility for a passenger or passengers. A SSR request is made using an SR entry, which generates an SSR element in the pnr and a request message to the Airline or Airlines concerned. An Service request does require confirmation from the Airline and it result in the automatic placement of pnrns on queue if a response is received from the Airline.

SRVGML	Meal request – Vegetarian Vegan Meal To get meal codes in Amadeus use help page: HE MEAL.....and MS22

To transfer a booking to a different office	QE/KWI1A0900/8C3
To send a general Message	QE/KWIKT2269/97

FARES AND PRICING

FOR HELP: HE FARES, GP DIS

Amadeus Fares and Pricing is a computerized air travel pricing system. Its database stores millions of public and private fares for hundreds of different providers. It can construct an unlimited number of fares through a dynamic add-on processing facility

The Amadeus fares and pricing entries allow you to:

- Display fares
- Price an itinerary
- Request fare rules and conditions
- Request currency conversions
- Calculate mileage for a route of city pairs

Amadeus fares and pricing entries are divided into two types of transactions:

Fare Quote (FQ) - The Fare Quote transactions display information based on the data contained in an entry. No PNR is required for these entries.

Itinerary Pricing (FX) - The Itinerary Pricing transactions price a specific PNR itinerary. A PNR must be present when these codes are used, or a PNR is created as a result of the transaction.

FARE QUOTE DISPLAY (FQD) ENTRY

Below is an example of an International fare display request from Kuwait to London on BA

```

FQDKWILON/ABA/D10OCT

```

Here we give a brief overview of each element in a basic fare display

HEADER

FQDKWILON/ABA/D10OCT	FARE DISPLAY REQUEST
ROE 0.280524 UP TO 1.00 KWD	Rate of Exchange and Currency
10OCT12**10OCT12	FARE REQUESTED DATE
/BA	FARES FOR REQUESTED AIRLINE
	If you do not specify an airline it appears as /YY
KWILON	CITY PAIR
/NSP	Normal and special fares
	• NLX - normal and excursion fares
	• CNX - companion, normal and excursion fares
;EH	Fares based on a specific global routing indicator
/TPM 2894	Ticketed point mileage
	This is the actual published mileage for the route
/MPM 3672	Maximum permitted mileage This is the maximum number of miles you can travel on this route on this fare to avoid extra charges.

The following table explains the items in each column for second part of fare display requested for city pair showing from lowest to highest:

COLUMN	DESCRIPTION
LN	Line number
FARE BASIS	Fare basis The fare basis code can give you information about the type of fare, type of passenger, class of travel, minimum and maximum stay, reservation restrictions, seasonality, and days of travel.
OW	One-way fare amount
KWD	Currency code
RT	Round trip fare amount
B	Booking class (Reservation Booking Designator) Note: A plus sign (+) indicates that more than one booking class applies. Use FQS to obtain more information.
PEN	Penalty information. Note: To see more penalty information, use FQN to check the fare note/rule. For fares in markets that are not automated, this is always a plus sign (+).
DATES/DAYS	The display contains up to two lines of date /days restrictions.
AP	Advance purchase requirements
MIN	Minimum stay restrictions
MAX	Maximum stay restrictions
R	Routing information. If you see a + sign in the routing column, use FQR to see further information related to routing.

FQD ENTRIES (FARE QUOTE DISPLAY)

FQDKWILON/ABA/IR/D15AUG12 /R,01JAN12	Different Travel And Ticketing Dates - Future Date

Fare Notes: these are follow up entries of FQD

FOR HELP: HE FQN

FQN1	Display Fare note of line 1
FQN1*LI	Display list of Fare Note Paragraph.
FQN1*AP	Display Specific Paragraph from line No. 1
FQN1*PE	Display penalty paragraph from line no 1
FQR2	Display Routing Information on line No 1

CURRENCY CONVERSIONS

FQC37.87NUC/KWD	Convert from a NUC to a designated currency
FQC10.000KWD/NUC	Convert from a designated currency to a NUC
FQC100.00USD/KWD	Convert one currently to another currency (USD to KWD)
FQC100.00USD/KWD/15DEC11	Convert currencies up to 12 months in the past

ITINERARY PRICING

FOR HELP: HE FXP

FXP	Fare quote a new or retrieved PNR, create a TST
FXT3	Select the fare on line 3 for all passengers
FXT4/P1	Select the fare on line 4 for passenger 1
FXT4/P2,3	Select the fare on line 4 for passengers 2 and 3
FXT1/P1,3//5/P2	Select different fares for selected passengers
FXP/P1	Fare quote passenger no.1
FXP/P1,2,5	Fare quote passengers 1, 2, and 5
FXP/P1-3	Fare quote passengers 1 through 3
FXP/INF	Fare quote only infants

FXP/PAX	Fare quote only non-infants
FQQ3	View the ticket image for the fare on line 3
TQT	Display all TST
TQT/T1	Display TST number 1
TQT/T2	Display TST number 2

INFORMATIVE PRICING

Below entries can be used to price itineraries without completing the process of PNR. Fares can be quoted to class booked, child, infant and best available fares

FXX	FARE QUOTE WITHOUT TST
FXX/S2,3	FOR SPECIFIC SEGMENT
FXA	BEST AVAILABLE FARE
FXR	BEST AVAILABLE FARE AND REBOOK THE CLASS
FXA/KC -BUSINESS	BEST AVAILABE FARE FOR CABIN
FXA/KF -FIRST CLASS	
FXX/RCH	FARE QUOTE FOR CHILD
FXX/RIN	FARE QUOTE FOR INFANT

STEPS TO ISSUE TICKET

1. FXP -FARE QUOTE FOR CLASS BOOKED OR FXB – BEST FARE
2. FPCASH -FORM OF PAYMENT
3. FM0 -COMMISSION
4. FVKU -PLATING CARRIER (IF PRESENT DO NOT INSERT AGAIN)
5. RFS;ER -REFERENCE AND ER
6. TTP OR TTP/T1 -TST WISE OR TTP/P1 – PAX WISE

DISPLAY TST (TRANSITIONALLY STORED TICKET) AND TWD (ELECTRONIC TICKET)

TQT	Display a TST
TQT/T2	Display a TST number 2
TWD	Display E- ticket record from PNR
TWD/L6	Display E- ticket record from PNR referring specific FA or FHE element. (L6)
TWD/TKT229-1234567890	Display E- ticket record using ticket number outside PNR

VOID -ELECTRONIC TICKET (E TICKET)

STEP 1.	TWD/L6 OR TWD/TKT125-1234567890	- DISPLAY E TICKET FROM PNR BY FA OR FHE LINE NO - DISPLAY E TICKET BY TICKET NUMBER
STEP 2.	TWX	- VOID E TICKET

RESERVATIONS GUIDELINES –(IMPORTANT DO'S AND DON'TS)

AIR PNRs

Name Change

- ✓ Do not use fictitious passenger names or speculative segments to block space to facilitate future booking requests.
- ✓ Ensure passenger names are identical to travel documents and passports, including complete first names in order to avoid confusion and possible duplicate bookings.
- ✓ Please check GGPCALNCC and also GGAIKXX (or direct with the carrier) for name change policy and to gain name change authorities for each carrier in the PNR.
- ✓ If you require the Amadeus help desk to make the modification please add the following RM to your PNR and then contact the Amadeus help desk: "PLEASE CHANGE NAME OF PASSENGER SMITH/MICHAEL MR TO SMYTH/MICHAEL MR. I HAVE AUTHORITIES FROM ALL AIRLINES IN THE PNR. THANK YOU ABC TRAVEL."
- ✓ Amadeus will not be held responsible for any cancellation of bookings by the airlines, as a result of illegal name change.

Flight Segment

Do not cancel an HL (Waitlist) segment and rebook the same flight as HK (Confirmed) in one transaction as it may cause confusion and reject in the airline's system. It is recommended to do this in 2 separate transactions.

- ✓ Do not cancel and rebook segments for the purpose of extending the airline's Ticket Time Limit (TTL) as it is considered system abuse by carriers and may result in a PNR cancellation by the carrier.
- ✓ When making last minute bookings or changes ensure Record Locator Return in the PNR and ticket numbers are present prior to the flight going under airport control (depends on airline access level)
- ✓ Do not create passive (PK) segments unless there is genuine need for ticketing, to prevent passive segment charges from airlines.
- ✓ Do not modify segments when PNR is localized or taken over by airlines. You must contact the airline directly for any modifications.
- ✓ Do not create multiple trips in the same PNR as it may be considered a duplicate booking in the airline's system.
- ✓ Do not override Minimum Connection Timing warnings at time of ET. Look for alternative connections instead.
- ✓ Never rebook a flight which has already been rejected as UN, NO or UC status. If an airline has rejected the segment to you once they are not obliged to send a second rejection to the same segment.
- ✓ Limit the number of waitlist segments of same sectors for same airline to avoid confusion in airline systems.
- ✓ Delete (DL) rather than cancel (XE) all inactive segments with status codes HX/NO/UC/UN.

PNR SPLIT

- ✓ Do not make any modifications to a PNR in the same transaction as a split.
- ✓ Ensure you have received the RLR from airline after split prior to modifying.
- ✓ If RLR is not received contact your local Amadeus helpdesk.

Record Locator Return

- ✓ Check GGPCAxX to see if carriers in your PNR participate in RLR. If so, wait for RLR before making further modifications to your PNR.
- ✓ Most carriers return a RLR within 4 hours, except Standard Access carriers which may take up to 12 hours.
- ✓ If a RLR isn't returned please contact your Amadeus help desk.
- ✓ Check with airline if PNR contains more than one RLR from the same airline.
- ✓ Check time of RLR history (RLH) and PNR history (RH) to ensure modifications have been acknowledged by airline.
- ✓ In case Airline locator is not returned , do not create new PNR as it would lead to dupes in the Airline system when the PNR is synchronized later. Also refrain from canceling PNRs that have not received the Airline locator. Report such cases to your Helpdesk for further investigations.

SSR/OSI - (SPECIAL SERVICE REQUEST AND OTHER SERVICE REQUEST)

Do not use any of these special characters/symbols (*;:, # \$?) in AP, OSI & SSR fields in the PNR. They are not recognized by the airlines systems; hence they can be rejected upon transmission.

- ✓ Cancel all inactive or unwanted SSR, OSI & RM elements in PNR to prevent confusion.
- ✓ Contact numbers should be put in OSI YY.

Duplicate Booking

- ✓ Please ensure that no duplicate bookings are already created for the same passenger and itinerary.
- ✓ Verify passenger's name by RT/PAX NAME before creating a new PNR to avoid duplication.
- ✓ It is recommended to query your customers if they have already made a booking elsewhere before commencing your PNR.
- ✓ Cancel all duplicate bookings BEFORE commencing your PNR rather than after to avoid the cancellation of your own PNR in the airline's system.
- ✓ All multiple bookings where it seems impossible or unlikely that the passenger takes both flights may be considered as duplicate in airlines systems.

PNR Reuse

- ✓ Do not re-use an inactive PNR which has expired or has been cancelled for any reason (i.e. expired TTL, no-show, segment flown, etc).
- ✓ Instead, you may use the RRP entry to copy the passenger's data to create a new PNR. For more details refer to our help page >HE RRN.883

Direct Access

- ✓ Use the Direct Access availability display to book a seat on the airline participating in Direct Access (*) level. The seat is guaranteed upon End Transaction (ET).

E.g. **1XXAD 24MAR KULJKT** (XX – two letter airline code)

- ✓ Please refer to HEDIRXX to see the functions supported by these airlines such as Availability, Schedule, Seat Map, Flight Information, Fares, Secondary PNR display and Miscellaneous.

Standard Access

- ✓ Do not use SB entry to rebook flights originally booked in Standard Access. Cancel and rebook in 2 transactions is recommended.
- ✓ The seat will be guaranteed 12 hours after bookings were made. The airline may have the rights to Reject Sales with status code -US- within 12 hours. Refer to GGPCAXX for access level.

Passive Booking

- ✓ Ensure that name and flight details exactly match the airline's PNR.
- ✓ If you wish to cancel the live booking you will need to contact the airline office, not just XE the passive segments.

Test Pnrs

- ✓ Do not create test PNRs only for pricing purposes. Instead you can create PNRs with GK segment or use the Amadeus pricing by mask functionality (FQP/S option)

E – SUPPORT CENTRE

The Amadeus e-support centre provides a single access point to a range of information and services such as troubleshooting and self-learning articles, real-time alerts, tips, product news and rollouts, and documents. This self-service web-based support tool is designed specifically for travel agents. It is accessible from the Amadeus selling platform, or from your web browser. To access Amadeus e-support centre from Amadeus Selling Platform, select the Amadeus e-support Centre smart Tab
